*from tiny acorns mighty stories grow*  
a short book

Mark has always been amused by small things, often the smaller the better. His goal, in the current series, is to reduce these still further, to extract the very essence of insignificance, and to distill a sense of diminishing wonder. The current volumes are dedicated to his long-time friend and co-publisher, *callum*, and would not have been possible were it not for the weak nuclear force.
